

Can **everyone** reach your information?

**One-touch
tilt and lift**

**from 750mm
to 1210mm**

**elephant&mouse accesspods
accessible touchscreen kiosks**

PULL

The new touchscreen accesspod

Most touchscreen kiosks are not adjustable, making them difficult for many disabled people and children to use. Yet the Disability Equality Duty requires that everyone has equal access to the information and services provided by public sector organisations.

The **new** all-inclusive touchscreen **accesspod** from elephant&mouse provides an innovative solution – enabling everyone to access your chosen information.

Unique design. Total access.

Featuring a unique one-touch tilt and lift function, the **accesspod** lets users position its screen height and angle to suit their personal needs, allowing you to communicate with different audiences via a single all-inclusive kiosk. Plus the **accesspod**'s bright, LCD touchscreen, advanced processor and cheerful looks make it a fun, fast and friendly resource in any environment.

Fun, friendly and flexible.

- Unique one-touch tilt and lift feature lets users find optimal screen height and angle
- Bright 17" LCD touchscreen, fast processor and large memory deliver demanding web content
- Child-friendly ergonomic design in choice of 4 eye-catching colours
- Range of sound options, plus bespoke colours and corporate branding available
- Comprehensive lease and purchase packages include delivery, installation, welcome screen creation and full support
- Prices from £2,490 + VAT
